Introducing - Veterinary Dairy Spray Liniment

By Dan Leiterman

Crystal Creek is pleased to announce the addition of the new Veterinary Dairy Spray Liniment (VDSL) to our family of liniments (Veterinary Dairy Liniment and Lini-Rub). Veterinary Dairy Spray Liniment provides the same excellent performance as the original rub-on Veterinary Dairy Liniment, only now with the convenience of a spray-on application.

Veterinary Dairy Spray Liniment is a powerful analgesic that combines the proven benefits of both warming and cooling 'contrast therapy' for challenged muscle tissue and edema relief. The deep penetrating warmth soothes and supports proper circulation, while the lingering coolness helps to reduce edema and inflammation of muscle tissue.

If you prefer a spray-on liniment, try Veterinary Dairy Spray Liniment and see the difference – it is stronger and is better priced than the competition. If you prefer rub-on liniments, try the Veterinary Dairy Liniment (a white cream based liniment) or the Crystal Creek Lini-Rub (an oil based liniment) and experience their excellent performance. If you have not used a liniment on your cows yet, try a Crystal Creek liniment – Your Cows Will Love It.

Veterinary Dairy Spray Liniment Features:

- Available In A 24 oz. Spray Bottle Or A One Gallon (128 oz.) Refill Jug

- A High Performance – Strong Relief Formula:

'Contrast Therapy' Warming and Cooling
 Analgesic Pain Relief
